

Audit

Audits matter because regulators review your numbers differently than management does.

Our audit work focuses on identifying risks before they become regulatory findings, penalties, or credibility issues with banks and authorities.

As an established audit firm near you, we audit financials against current UAE standards and sector-specific requirements. Our team brings 25+ years of audit experience across industries, which allows us to recognise risk patterns faster than less experienced firms.

What matters to you:

- Will these numbers stand up to regulatory scrutiny
- Are there material risks management has overlooked
- Can leadership sign without reservations

Our audits examine:

- Revenue recognition
- Expense classification
- Provisions
- Related-party transactions
- Internal controls that attract attention

We identify areas that increase compliance risk.

Reports remain aligned with the latest regulatory updates, reducing follow-up queries and rework. For those of you searching for a reliable **auditing service near me**, the outcome is audit-ready financials and confident leadership sign-off.

Accounting & Bookkeeping

See your true financial position at any point in time.

Accounting is not about recording transactions. It is knowing where your business stands financially right now and trusting those numbers when making decisions.

We have refined our accounting and bookkeeping processes over decades.
Our experience across sectors reduces rework, corrections, and reporting delays that distort management decisions.

How we help you see your financial position clearly:

- ✓ Proper expense classification so costs are not overstated or understated
- ✓ Accurate revenue timing to avoid artificial profit swings

✓Clean balance sheets that reflect real liabilities

✓Monthly reports that align with compliance requirements

CFOs and owners rely on our reports to answer questions like:

1. Can we safely distribute profits?
2. Are margins improving or eroding?
3. Is cash flow under control?
4. Are expenses tracking correctly?

We maintain records continuously so financials remain audit-ready at all times.

This avoids year-end clean-ups that consume management time and create uncertainty.

Our monthly reporting provides consistency.

Management reviews the same structure every month, which improves forecasting and trend analysis.

The result is straightforward:

Reliable numbers that withstand scrutiny, support decisions, and reduce financial surprises.

Accounting & Bookkeeping packages

Starting from AED **1,500**, subject to transaction volume.

Discuss your transaction volume and requirements in a **free 30-minute consultation**.

VAT

Meet VAT obligations without uncertainty.

VAT errors do not usually come from intent. They come from misinterpretation, outdated practices, or incomplete documentation. Our VAT services prevent those errors.

We handle VAT with hands-on experience across multiple industries. Our team continuously tracks FTA rule changes, clarifications, and audit trends so returns reflect current interpretations.

What matters to you:

- ✓ Are VAT positions defensible during audits?
- ✓ Are we reclaiming what we are entitled to?
- ✓ Are transactions classified correctly?
- ✓ Are we exposed to penalties?

We review VAT treatment at the transaction level, including supplies, exemptions, imports, exports, and intercompany charges.

Returns are prepared to align with documentation requirements, not assumptions.

We also review processes to ensure VAT is handled correctly going forward, reducing future risk.

Businesses working with us avoid penalties caused by incorrect filings, missed adjustments, or outdated interpretations. Your VAT becomes controlled, predictable, and compliant.

Corporate Tax

Reduce exposure & Control tax impact.

Corporate tax affects profit directly. Errors create permanent costs.

Our approach focuses on correct application from day one.

We apply UAE Corporate Tax rules as they evolve.

Our 25+ years of tax advisory experience informs every calculation and adjustment.

How we reduce tax burden legally:

- ✓ Correct classification of income streams

- ✓ Identification of allowable deductions
- ✓ Proper treatment of expenses and provisions
- ✓ Structuring within current law

Industry knowledge matters.

Different sectors face different tax risks.

We structure income correctly based on real operations, not templates.

As decision makers, you care about:

- ✓ Paying only what is legally required
- ✓ Avoiding aggressive positions that trigger audits
- ✓ Maintaining clean documentation

Our work ensures businesses remain compliant and audit-ready.

Leadership understands the tax position clearly before filing, not after.

Tax Advisory

Make decisions with tax impact understood in advance.

Tax costs should never be a surprise.

Our advisory services help leadership understand tax implications before decisions are made.

We advise using insights built across diverse business models.

Regulatory updates are monitored continuously, and recommendations reflect current law.

This matters when:

1. Expanding operations
2. Restructuring entities
3. Introducing new revenue streams
4. Entering new jurisdictions

Get clarity on consequences, risks, and compliance requirements before committing.

The goal is certainty.

Plan with confidence, not assumptions.

Company Formation

Choose the right structure before it costs you later.

Company formation decisions affect tax, compliance, and operational flexibility.

Fixing a wrong structure later is costly.

We guide formation using experience across multiple industries.

Entity choices reflect current tax and compliance realities, not outdated assumptions.

Regulatory changes are considered before registration.
This prevents structural corrections later.

Business owners get clarity on:

- ✓ Jurisdiction impact
- ✓ Tax implications
- ✓ Compliance obligations
- ✓ Long-term flexibility

The result is a structure that supports growth, remains compliant, and avoids unnecessary restructuring costs.
